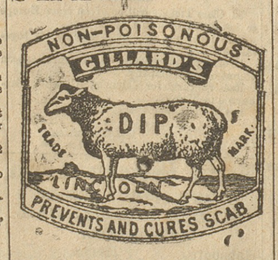
GILLARD'S SHEEP DIP



This Dip is most carefully prepared by the latest improved methods and can be used with
COLD WATER
Supplied to the Prince of Wales's Farm at
SANDRINGHAM
TESTIMONIALS.
From Mr. John J. Mahon, Capilla del Señor, June 29, 1881.—The dip which you sent me I used according to directions, and I can assure you that it gave the desired result. During four years of practical experience of curing scab in sheep, I have seen many specifics used, and I consider Gilliard's the only one that gives complete satisfaction. It improves the quality and promotes the growth of the wool. For efficiency, economy and facility of application, I prefer it to any dip I have used.
From Mr. James M. Thomas, Estancia Santa Ines, Monte, June 29, 1881.—Having given a good trial to Gilliard's Dip, I have much pleasure in bearing my testimony to its valuable quality as a Sheep Dip. It destroys all insect life with which sheep are infected, mixes readily in cold water, does not injure the hands, and softens all hard parts. I shall strongly recommend it whenever an opportunity offers. As regards the cheapness, it should command a good sale.
From Mr. Wm. Petty, Estancia Caro, Colonia, Sept, 20, 1881—
"I feel great pleasure in informing you that the sheep dip supplied by you to me under the name of Gillard's Sheep Dip has had surprising results on my English long-woolled rams; it has kept them entirely free from scab after only twice using it, although those rams have been constantly running in a flock of scabby sheep. I intend for the first time to give it a trial with the whole of my English breed of sheep as soon as I have them shorn, as I feel satisfied I shall with that did keep scab out of the flock.'
From Messrs. Patrick Mahon, junr., Cirisco Morales, and James Murray, Capilla del Señor, Sept. 18, 1881—
"It gives us great pleasure to inform you that, after giving a good trial to Gillard's non-poisonous sheep dip, we can pronounce it to be the best specific we have used as yet, and we are fullly determined for the future to use no other remedy."

Dean Dillon, Messrs. Drysdale and Captain Pauli, H.B.M. Consul at Buenos Aires, go up to-night in the Mondego.

Associated Press Telegram

HAVAS' AGENCY

Madrid, 22nd.

In to-day's sitting of the Deputies an interpellation regarding the island of Borneo was presented to the Government. In reply the Minister stated that arrangements with the Dutch Government were nearly concluded, and that the complaints of Spain would be attended to.

The deputy who presented the interpellation considered the answer satisfactory.

THE CATALINAS MOLE.

The printed protest of the Buenos Aires merchants has been published in nearly all the papers of the city: some who knew everything about the matter applauded the attitude, whilst others, at a loss to decide in 'terra incoguita' beat about the bushes with empty arguments. The Minister of Finance has as yet done nothing to remove the difficulty, and it is probable that the lighter-men must return to scenes that were dearest ten years ago, and take to the cart. Meantime the cartmen of town cannot supply vehicles enough to transport all the merchandize in the present rather active period of the wool market. If such is the squeeze at present, what will it be later on? The steamers wait in vain for the return of the lighters, and flags are flying from every mast, asking 'what has become of the lighters?' The vessels cannot leave, and an uther disorganization has ensued, which shows at a glance the ability of whoever drew up the measure regulating the discharge of the lighters; there is only one class of people that approve same, and that is the cartman, who derives some benefit from the unexpected squeeze.

The Catalinas Mole stands out a melancholy contrast to the shouting, cursing and horsewhipping on the beach near the Administrador de Rentas's Office, who with an Argus eye watches the mess and confusion created. The steam cranes, belonging to Mr Seeber, the locomotives, in fact all the progress of our vaunted civilization has had to withdraw before the onslaught of retrograde influences, contained in the lighterage measure, a decree worthy of the middle-ages. The country as yet appears not to have reached that period of sobered maturity to appreciate steam and economy, private enterprise and energy. We have steam engines and the old Egyptian bullock-carts nightly arrive at the wool-plazas; we have 3 moles and we prefer using carts instead; we have an Administrador de Rentas, appointed to attend to the interests of the commercial public, but who meddles with private matters and injures the interests of all, representing a loss of millions to commerce, that the Government may get in 20 or 30, 50 or 100,000$ more per month. What are $100,000 to a Government? Nothing, if we looks to the enormous losses, the vexatious delays and general feeling of annoyance created thereby; the Government will get in money this way, but will certainly lose it in another. If such an oddity as a private mole, if such an anomaly as private deposits cannot be countenanced by our democratic and Government house principles, let the Finance Minister expropriate same; we greatly fear for commerce, that after the expropriation it may be preferable not to go to the wharf at all, and that it will be found cheaper to discharge in the playa or in the Boca, as Mr Seeber's charges will only constitute a flea-bite to the future fiscal appetites.

Minister Romero might lay claims to the reputation of being a very successful Minister of Finance should he carry out this expropriation; we are quite sure that Congress will be only too glad to ratify anything of the kind. The Catalinas Mole is worth £250,000, but it could be got, we think, for £200,000. The business is a magnificent one, as the Administrador can very well inform Minister Romero of, by letting him have a peep at the confusion in the plaza. £200,000 stg. is no doubt a large amount, but represents much less than the Almirante Brown, with the further considerations that the money spent in expropriating a mole will always flow back to the Treasury, forming a source of revenue. The only hitch we see in the business is whence the money is to come. One million patacons are not so easily found, although a company with that capital could be started to-morrow in the Bolsa for working Mr Seeber's mole. Minister Romero might pay the Catalinas mole company in bonds of the future consolidation loan, say at 90 p. cent: should same not be satisfied, a compromise might be arrived at, whereby the Consolidation Bonds might be changed for Treasury Bills, with a special clause, binding the Government to exonerate them from any consolidation policy, should same be carried out with respect to all other bonds.

As we have stated, the Finance Minister, like Disraeli and the Suez Canal, could do a brilliant financial stroke by expropriating the Seeber's wharf. The measure consults the

interests of the Government, for the country and of the merchant. There would then be no necessity of the old Aduana scaffolding, or the carts of the playa; all the deposits could be connected by a Fiscal railway, running from the Catalinas down to the Casa Amarilla. The project is one we seriously recommend to the Finance Office; the business can be done and should be done.

LATEST FROM EUROPE.

Gibraltar, Dec. 2d.

The following telegram has been received from London:—"Parliament has been summoned for February 7th. The sentences at Maidstone and Sandwich on the election agents is 9 and 6 months' imprisonment for bribery. The refusal to pay rent is becoming general in the West and South of Ireland. Lefroy has been executed.'

Reports of a plot to blow up the Guildhall were current on the 24th. They were asserted, contradicted on the authority of the police, and reasserted on the authority of the Lord Mayor. The warning is said to have been contained in an anonymous letter found in the Home Office, but how it got there is a mystery, as it did not come through the Post Office. The most positive account of the matter states that the vaults under the Guildhall were searched, and extra police were placed round the building during the night. What is certain in the business is that as yet no harm has been done.

The French Government has resolved to bring forward, in January next, the proposition relative to the partial revision of the Constitution.

Lord Hartington, in a late speech, maintained the necessity of carrying out the Treaty of Berlin in an efficacious and complete manner, and added that this was the only means of assuring the existence of Turkey, necessary to the maintenance of the peace of Europe.

The French Government has not yet occupied itself with the project of the purchase by the State of the principal French railways, but in preparing for it they will open up negotiations with the companies interested.

The Italian Ambassador will next Tuesday present to the Sultan the collar of the Annunciata, with great ceremony.

Herat and Teheran are tranquil and the trade of those cities is commencing again with Candahar. The Ameer will probably return to Cabul shortly.

Two railway accidents are reported as having occurred on the 25th ult. The most serious happened on the North British line at Tayport, about five miles from Dundee. A goods train was being shunted there when a passenger train from Edinburgh ran into it. The crash, it is said, was heard a mile off. Several passengers were killed on the spot, two were so seriously injured that they are not expected to recover, and eight others are more or less severely hurt. The second accident took place at Manton Junction on the Midland Railway. The engine had been detached from a passenger train to take a horse box. The carriages stood on a decline, the wind set them in motion, and they came into collision with the returning engine and horse brake. Six passengers were injured, one, it is feared, fatally.

The Vienna correspondent of the *Daily Telegraph* writes. It is announced from Athens that the work of piercing the Isthmus of Corinth is proceeding satisfactorily. Last week 10,000 cubic metres of earth were excavated. Twelve hundred Italian labourers have just been hired. The Royal mail between Thebes and Corinth was attacked and robbed a few days ago. A large sum belonging to the Government was stolen.

Intelligence reached Dundee of the loss of the Greenock ship Culzean, in the Sound of Jura, on the west coast of Scotland, on the night of the 22d, when the storm was at its height, and it is believed twenty lives have been lost.

At the Cork Municipal elections all the Land League candidates were defeated.

Count Kalnoky will have a conference with Prince Bismarck previous to his intended journey to St. Petersburg.

Hostilities have commenced between the insurgents in Crevascia and the Austrian troops.

The applications to the Irish Land Commissioners are so numerous that the Government is thinking of creating several more Sub-Commissions.

Another unsuccessful attempt has been made by the Terrorists against the life of the Czar, and in consequence the Imperial family has decided upon removing at once from Gatchina. The Russian police without allowing the fact to become publicly known, have arrested a considerable number of persons in St. Petersburg, Charkow, Tchernigeff and elsewhere, charged with complicity in a new Nihilist plot. Among the prisoners are the chief of the police of an important provincial city, two daughters of a high State official and two Jewish merchants, besides a number of students and certain active members of the Nihilist conspiracy. The new plot was of an extraordinary and fantastic character. It was decided to cause a kind of balloon or flying machine to ascend at the Palace near Gatchina. The balloon was to carry a quantity of dynamite and explosive fire balls, together with appliances which would secure that the balloon should fall within the Palace yard, when it would explode and set fire to the Palace. In the confusion it was intended to seize the person of the Czar, as well as the other members of the Imperial family who might be present. The machinery seized by the police shows that everything was in readiness for the execution of this plot. Nor is it likely that its realisation would have been frustrated but for the temerity of a younger member of the Secret League, who wrote an anonymous letter to the Czar, informing him that Gatchina would shortly be burned to the ground, and that he would soon be a prisoner in the hands of the Nihilists. The letter was handed to the police, who soon obtained a clue to the members and head-quarters of the new plot, the first arrests being the two Jews, who were found to be providing the materials required by the conspirators.

At Edinburgh last week says the *St. James's Gazette* of the 25th of Nov., the Commission of the Free Church General Assembly resolved by 125 votes to 20 that the time had come for raising the question of the disestablishment of the Scottish Kirk And they also determined to appoint a sub-committee to press the matter, as one of urgency and importance, upon the attention of Her Majesty's Government. This is a declaration of war against the National Church of Scotland by the most powerful of the Dissenting sects in that country, and the one which heretofore has refrained from entering the lists.

LONDON LETTER.

(From our Own Correspondent)

THE LAND QUESTION.

Were Lord Salisbury Premier tomorrow, and were Lord Randolph Churchill his Chancellor of the Exchequer, neither they nor the whole force of the Conservative party could arrest the revolution which may be said to have been inaugurated in England this morning by the *Times* newspaper. The Radical horse may be backed now to win at any odds. The one incubus on the progress of the nation—the territorial system—is doomed. This country henceforth is morally a part of the United States: it is being Americanised. Mr. Walter, M.P., and proprietor of the *Times*, has just returned from the States. With a pocket-full of information maps and statistics, he is lecturing his constituents on the advantages of emigration to the Western Republic. Meantime Mr. James Caird, the veteran writer on agricultural statistics, a Govenment employee and a cautious Scotchman, has, in the capacity of President of the Statistical Society, opened the year's proceedings with an address on the 'Land Question.' The *Times*, as a rule, does not trouble itself with statistics or statistical societies, but on this occasion it yesterday published Mr. Caird's address textually, the address occupying two or three columns of close print. This morning the *Times* published a leading article more than a column and a-half long, and evidently intended as a manifesto. The *Times*, from which two or three letters ago I quoted the opinion that the abolition of primogeniture and entail would have no effect on the agriculture of this country, and that 'settlements' could not be altered by law, now following the practical Mr. Caird as well as every economist of note, says—'No discerning politician can doubt that the question of English land in all its bearings will before long absorb the attention of the country and of Parliament.'

In the old jargon, thoroughly Walterian, it says—'The discussion of the question is fairly passing out of the academical stage and fast entering the range of practical politics.'

Again it says—'Parliament, under the guidance of one party after another has been tinkering at the subject for any number of years, and no one can doubt that when next the Land Question comes up for serious consideration very short work will be made with the provisions and customs of settlement.'

The shuffling and shifting of the *Times* is disregarded by people who think for themselves, but it still has effect on the gelatinous mass whose dead weight is necessary to carry a measure; and after this complete palinode on the part of the principal organ of sleek, pompous, common-place English opinions, we may be sure the revolution has commenced, a revolution quite as radical as was effected in France in the last century. The date of the palinode is a fine tribute to the once much-abused John Bright. The same number of the *Times* contains a long account of the festivities at Rochdale in honour of that thoroughly straightforward Englishman's seventieth birthday.

Starvation passed the Reform Bill. Rain and famine hastened the repeal of the Corn Laws. Boycotting and agitation gained the Irish Land Act. It has required the joint powers of American competition and Nature herself, who withheld sunshine for seven years from British corn lands, to convince a slow and lord-loving people of truths that theorists had preached to them for a century.

Mr. Eggerton's report has afforded materials for comments by Cockney editors. It is literally amusing to see the muddle they got into between Tucuman, Bolivia and the Argentine Confederation. The *Globe* quite made up its mind from the accounts from Bolivia that the Argentines would soon be a prosperous people. The *Pall-Mall Gazette* has come to the conclusion that the 'principal products' of the Argentine Republic are 'timber and sugar.' That is very cruel, considering that even crutches are scarce: few Argentines, except those who live in the Chaco or in Tucuman, have seen anything beyond an ombu. The city editor of the *Pall-Mall* is more serious. He warns us that some of the telegrams that come from your side look like 'puffery.' He reminds us that the civil war cost over five millions, and that altogether there is a deficit, and that there is a talk of new loans. All that is very wholesome, but the editor has evidently no idea what a 'deficit' means in South America, and that it is rather like what Macaulay said of the English National Debt, 'it was only a healthy stimulant.' I know you are anxious to hear about public opinion in England on Argentine affairs. The truth is, there is no opinion on the matter out of Argentine circles. If you have got anything to send, send it. If the people here are in a good humour, you will get what you want. If they are not, nothing will do. Above all, go straight at it, English fashion, without 'gauchadas.' The native emissary is apt to fiddle about for months between London and Paris, and in the end he does nothing.

EDITOR'S TABLE.

The Marseilles steamer Poitou has brought Gibraltar dates to the 2nd inst. We give extracts from the *Chronicle* in another column.

The Royal Mail steamer Mondego arrived at Montevideo on Thursday evening: her mails came up yesterday. Dean Monsignor Dillon is on board, and will be here to-day. A party of gentlemen, including Messrs. John J. P. Murphy, R. Eastman, M. Duggan, J. Feely, T. Kelly, P. Ham, and W. Dillon go out in a special steamer to meet him. The passengers are expected at the mole at 1 o'clock.

We feel much pleasure in welcoming to the River Plate H.M. new Consul in this city, Captain Pauli, who arrives here this morning with Mrs. Pauli in the Royal Mail steamer Mondego, Captain Pauli stands high in the Consular service. When the Communists were in possession of Carthagena, he was Consul there, and greately distinguished himself by his successful exertions to place British and other foreign residents in safety before the Government fleet began to bombard the city; he was subsequently Consul at Porto Rico, then at Cadiz, and lastly at Manilla. We trust that he will find Buenos Aires the most agreeable place to which duty has yet called him, and that he will lose no time in buying a Rio Negro estancia.

The Villarino is expected at the Boca to-day, from Bahia Blanca.

We publish in our Supplement to-day an article from a New York colleague that will interest the increasing class in this country that is connected with mining. The new process for reducing ores ought to be of much importance to them.

The Christmas Box business was tremendously brisk yesterday before breakfast and after dinner, shopping, or even talking shop, being too great an exertion in the heat of the day. In the cool of the evening every shop in Calle Florida was crammed with customers, and in none was there a greater crush than in the Libreria Europea, where every body was buying Christmas Cards by the dozen, aye by the hundred. That highly desirable thing 'a large circle of friends' proves to be a very costly business at Christmas time, but Messrs Jacobsen's visitors seemed to think nothing of it. Many Argentine families are now adopting the fashion of sending Christmas Cards.

The chief news from Montevideo yesterday was that a big firm there has offerred to farm the Custom House at that port, paying the Government 500,000 N. Dols. monthly. A queer spec, but perhaps not a bad one, if a heavy prohibitive duty could be put on displays of patriotism and attempts to 'regenerate' the country. The Sanchez Caballero business has come to the front again with something of such unutterable 'gravedad' that it cannot be published. Bah!

The inauguration of the Elevator at Rosario on Thursday evening was the grandest affair ever seen there since the place was founded. The whole town was in a state of 'entusiasmo' that baffles description. Governor Iriondo acted as godfather to the promising infant. The ceremony wound up with a superb banquet at the Hotel Universal. We expect full particulars to-day from W.P.

The sins of omission and commission which the National Bank shares have to answer for have just been added to by the flight of a Rosario merchant who came to town to collect 17,000 pats for his firm, entered the share market, and lost every copper of it. Sad, very sad.

There was a frightful thunderstorm at Juarez on Thursday and three men were killed by lightning.

There is a move on foot, a colleague says, to get the Messagerias Fluviales Company of Salto to run steamers to and from the Rio Negro. The idea is a good one, but the company's river steamers wont by any means answer for such a service, on which sea going vessels are required.

Colonel Rudecindo Roca, the President's brother, is likely to be the Governor of the new territory of Misiones.

The Village of the Plain will be a gay place to-night. Illuminations in the Plaza, 'musica', fireworks and balls given by several Argentine families. We hope Jupiter Pluvius will not interfere with this Noche Buena programme.

A young Spanish girl subject to attacks of sleep-walking, fell from the roof of a house in Calle Cuyo on Thursday night and received such injuries that she died in two hours.

King Humbert saves every penny he can from his private income to pay off his father's debts, which were of the heavy order. His Majesty, though by no mens niggardly, is the reverse of his late royal 'governor' in the way of high living and extravagance, while he has fully inherited the Rey Galantuomo's passion for field sports.

The obnoxious Cattle Brand Renewal Law was promulgated yesterday. $500 m|c for the 'renovacion,' and $500 more for the stamp. Whew!! There are 80,000 cattle marks in the province. Multiply this by 1,000—$80,000,000 m|c. Most of the marks belong to poor people who cannot possibly pay this outrageous tax without ruin. What were the estancieros in the Chambers about, and that precious body, the Rural Society, to allow this measure to become law.

The Pacific steamer Iberia brings later dates than the Poitou—to 8th inst. The opposition to Bismarck in Germany is on the increase inside and outside the Reichstag. President Arthur, in his message to Congress, says the Public Debt of the United States will all be paid off in ten years.

The way some middle aged gentlemen, anxious to be thought gay young sparks of 25, alight from tram cars is a caution: most of them make a feeble attempt to imitate the 'Mayorales' by alighting on the right foot, with a step backward, while the car is in motion, but some turn their backs to the horses and plunge out boldly. Nothing in Guillaume's circus at all approaches the startling result of this manoeuvre: sometimes the skull is the first part that touches the ground or is banged against the wall: sometimes a complete summersault is turned and a broken neck narrowly escaped; at others the rash man who has defied the laws of motion spins round like a top and finally is shot all of a heap into the middle of the street. The variety of results is endless, and the marvel is that more serious accidents do not occur. On Thursday at the south end a man who tried to alight while the car was moving had both his feet cut off by the wheels.

Mr Simons, of the well known Bazaar Ingles, in Calle Florida, has added some splendid Christmas cards to his varied stock. We verily believe that there is nothing, from a needle to an anchor, that can not be had in this wonderful store.

The wordy war about the Education Board is getting tiresome, as even good things too often do, when we get too much of them.

The Admiral Brown is going to Montevideo next week. An evening colleague hints that there is not enough water for her at Ensenada, which is quite possible. The sooner some of the deep bays on the Atlantic are made the head quarters of our navy the better.

We feel great pleasure in saluting our talented and most readable German weekly colleague *The Wochenblatt* which reached its 200th number yesterday. It well deserves the decided support it has obtained, and we sincerely wish it a continuance of same.

We regret to hear that Mr Huss, Editor of the *Cattle Review*, fell in with a tiger during his recent trip in the West, and was so terribly manned that the loss of one of his legs is feared. He was brought into Bragado in the diligence.

The *Mosquito's* Almanack for 1882 is one of the best that our very clever colleague Mr Stein has ever issued. The duel between the *Mosquito* and Sarmiento is side-splitting, and the bit at the decrepit efforts to prevent cruelty to animals is equally good. The portraits of the President of the Republic and the members of his Cabinet are very well done. We congratulate our lively colleague.

A colleague gives a list of no fewer than seven young girls, from 14 to 19 years of age, that ran away from their homes in this city on Thursday. What tragedies this announcement is the prologue to.

A colleague denies categorically that the National Finance Minister, Dr Romero, intends to resign.

President Roca and Governor Roach had an hour's chat on Thursday, and the conference is said to have been of 'alta importancia.' What was it all about? The Indians?

Plaza Libertad is being thoroughly touched up in preparation for the unveiling of the statue of the late Dr Adolfo Alsina. The ceremony has been postponed till New Year's Day.

EMILIO CIVIT.

ON 'CHANGE.

Dec. 23rd

Patacons	25.—
Cedulas A	100
Do E	85
National Bank Shares	118½

The operations in gold have come to a standstill; plenty offering at 25.02 for end of month, but no buyers. The prospects of the various banks in this city next year were much discussed, owing to the new leaf that will be turned over on January 1st. The Tribunals and the Juezes will all be National, and the jurisdiction of the Nation will be unalloyed. All the bank privileges will cease with the exception of the National Bank. Both Mortgage, Provincial and private Banks start on an even footing in this city. The change was anticipated for some time, and does not excite much attention for the moment, but everything nearly will undergo a sudden change of the very greatest importance. The above remarks are the tenor of an article in the *Expositor* of to-day, and attracted much notice on the Bolsa.

Cedulas E were sold out to-day on 'Change at 85, which shows the very rapid rise of the stock. Cedulas A at par and plenty of sellers.

The National Bank Share market was weak to-day, and we remarked some heavy holders selling out for end of December, and buying in for end of January. But for this circumstance the stock would be firm. The names of two new Directors were mentioned by the brokers for the new Bank Board; both enjoy in the market a well known reputation and their probable advent is hailed by many holders of shares with satisfaction. The business in the stock this morning was brisk, although only 170 shares were sold for cash at 118½; over 3,000 were sold for end of month at 119 and 118¾, and a fair amount for the end of January at 121, and 120¾. Prices for end of month and for cash show a fall since last night, and the feeling in the market is very indifferent. The movements of the heavy holders are closely watched, as they decide the course of the market, and will do so till the end of the month.

Little doing in exchange.

The sales at the ring were—

Gold—

Nothing done.

Cedulas—

For cash A 26,600 at 100
For cash E 6,100 at 85
For Dec. 24th E 8,000 85
For Dec. 31st A 10,000 100
For Jan. 31st A 10,000 100
Sales, 60,700.

Nat. Bank Shares—

For cash 170 shares 118½
For Dec. 31st 3,050 shares 119–118¾–119
For Jan. 31st 1,050 shares 121–122½–121
Sales, 4,270.

There is some complaint against the Western Railway's management for the accommodation of passengers. This morning a great number of gentlemen had to stand, and amongst them we noted a member of the Board. So Flores people may expect a speedy remedy to the evil.

Owing to the dry goods auctions now going on there is not much doing in the large importing houses, as buyers hold back.

Dean Dillon has arrived in Montevideo; we welcome him back.

Money is now somewhat tighter on loans for National Bank Shares; in general we now quote same at 12 o/o; a rise of 2 o/o in the week.

In reference to the remarkable rise in the value of lands in this province we erroneously stated the day before yesterday that the Juarez Fiscal lands fetched 1,000,000 m|c.; the price should be 1,000,000 m|c per square league, which makes an important difference. The entire lot comprised 1½ league and was knocked down for something over 1,500,000 m|c.

In the partido of Las Flores a sale of 1½ square league of land is reported at 1,100,000 m|c. Seller Mr Pineda; buyer Mr H T Grigg.

The fine prop rty belonging to Mr F Younger, and situated in the Lomas de Zamora, has been bought up by the Provincial Government for 140,000 m|c; a real bargain. The Provincial Government bought up this fine site with a view of enlarging the Santa Catalina Model Farm alongside.

There is some large business on the tapis in novillos and land.

The day before yesterday a tropilla of novillos of Mr Unzue was sold in the Corrales at the heavy rate of 440 m|c per head. The business had been kept quiet, but it has leaked out. These animals were sold 'al barret.' The saladeristas are complaining of the high prices of novillos, and estancieros do not appear inclined to let go. Sales of cattle in general are few, and we have heard of more in cows since the one we published 'al corte' 300 m|c per head in the South of this province, some 600 animals only.

The large sale of lino in the North Plaza at 13½ m|c per ar was much commented on. Considering the large quantity the price is very good, and it is said has been made to complete contracts abroad. For small amounts of flax 13½ m|c has been refused.

At afterhours some 3,000 shares were sold, including some 800 for end of January at 121¼. The market stiffened at a late hour and prices that had ruled at 119½ and 119¾ went up, the market closing buyers 119½. The stock closed firm.

Messrs J Walderp & P S Dirks, both engineers of the Dutch Government and with a wide reputation in Holland, have arrived in the Mondego. We hope they will like the R. Plate, although they will not meet with scenes as attractive as in Rotterdam or La Hague.

The Bank discounted to-day five million[illegible].

The lighterage nuisance continues, and what with the Rentas measure and the extraordinary activity in exports, there is a dead lock in loading and unloading. Capt. Blair, who came to this country 20 years ago, says that everything has changed in the R. Plate except the old lighterage arrangements.

The export of wool this month promises to be off the common, and shippers state that never before were so many bales dispatched.

Freights rule the same as usual.

The Poitou has arrived in Montevideo; it is thought that when she arrives in this port she will not find sufficient lighters for discharging cargo.

Several people were discussing the fate of the Conciliation Bill in the Finance Committee of the National House of Deputies. We think that Dr V. de la Plaza will view the Bill in the same light as the market, and that a strong opposition will greet its appearance in the house.

Exchange 50d drawers 50¼d takers, francs 5.25. Few takers and scarcely anything doing.

In Treasury bills some sales were effected at 116; but sellers ask more higher rates.

Certificados of the Banco Argentino were done to-day at 18 o/o.

The Cordoba land auction of Baltar's did not come off to-day; no bidders although the lands are alongside of General Roca's estancia, and it is expected that the railway will run through same. We believe these lands will be sold privately. Our readers remember the Cordova auction some time ago at the National Oficina de Tierras and the high prices fetched: some of the latter camps, some 30 leagues, have been resold in these latter days at a profit.

A party of gentlemen leave to-morrow morning to spent Christmas in the 'Media Luna' district and to inspect camps of same.

On the 4th of January an auction of Lincoln camp will take place.

Payments on the Lincoln auction of the Government fall due in these days, and many parties are trying to get bargains out of parties who cannot meet same. The demands in general high.

The Mondego has arrived in Montevideo with £30,000 stg for Liebig's establishment. She brings many old friends back. Mr S Drysdale and family are on board. The dates are up to 28th ult.

All the Entre Rios saladeristas have now arrived in B. Aires, and are selling their hides and tallow on the Bolsa.

Mr Schwartz is making at present 2 electro-dynamite machines for plasting purposes, these are the first ever made in the country.

In the Plazas the wool market was very active. The Once is being emptied very fast. Arrivals to-day 28,000 ar. nearly all sold. A notice has been posted up requesting the estancieros and consignatorios to write in ink the name of the places whence the wools come, with the old lead-pencil practice, Bagley's indio-rubbers used to be employed and other names substituted.

Mr Luis Irigoyen sold privately to-day ten more of his fine cows at an average price of 2,200 m|c per animal. Mr Irigoyen's cabaña is very favorably known, and the fine cows therefore could be seen yesterday at Baltar's, when seven of them were put for auction and sold.

Discounts are not very easy at present; paper at 7 to 7½ o/o, gold 6 to 6½ o/o. The banks are discounting little.

Roads and Bridges are firm; no operations effected to-day. Sellers ask 104.

The Sales at afterhours were—

Gold—

Without operation.

National Bank Shares—

For cash 300 shares 119½
For Dec. 31st 300 shares 120
For Dec. 31st 700 shares 119½

Yesterday in the National Deputies, an honorable member moved that the 100 millions pats consolidation project be printed and distributed to the house to study. The motion was not carried, as the Bill must be first considered by the Committee of Haciendas, who will have ample opportunity to mediate on the opportunity of the Bill.

The *Pampa* states that several sales of novillos have been effected at 350 to 380 m|c. picked animals and fat.

The Villarino is expected to arrive in port to-morrow evening [sturday].

It appears that the Provincial Bank of Santa Fe is in a most prosperous condition, and that the deposits this year shew an increase of one million pats, as compared with same last year. The increase in the deposits shows the growth of the wealth of that province, and the wheat this year will add a further million pats to the deposits of the establishment. The circulation of the Bank in the province amounts to 1,450,000 pats, slightly heavier than in former years.

The result of the Juarez land auction has opened the eyes of the Provincial Government. Mr. J Freire, the head of the Land Office, did not anticipate such high prices, close on 1,000,000 m|c. per league. The Government intends selling further lots in the South, and we much doub. if the prices will be maintained. The land sold in Juarez is exceptionally good, and we may on average calculate that the league is worth 300,000 m|c. at least there is camp offering in the market at that figure. In reference to the Provincial land auctions it was generally thought that the Government would not let them go, as they intended to start colonies on same. The Government, we think, has still some fiscal lands near Bahia Blanca, and it would be far better to keep same for colonization purposes than sell them. Whilst land in this Province is selling at such very high figures, we hear that in Paraguay leagues of camp near the Paraguay and Parana can be had for a song. A subscriber who has been recently down there states that there is no place South of the line offering such advantages for small capital as the virgin lands of Paraguay.

Santiago Amaral e hijos
El Domingo 1 de Enero 1882
A las 2 en punto

Procederemos a vender por orden y cuenta de su dueño, un lindo y selecto lote de toros Durham, 7/8 y 3/4 sangre, procedentes del Establecimiento San Mariano situado en el partido de Matanzas, fundado por el malogrado Señor Don Juan Ignacio Escurra.

Los productos de este establecimiento gozaban de justa fama entre los criadores, pues los animales eran ya notables, es ademas sabido que el Sr Escurra, sobre la base de hermosas vacas de origen de Alfaro y Tapiales, han adquirido toros puros, los mas notables de los importados al pais, tal es pues, el origen del unico lote de toros que ofrecemos en venta, y ellos seran fraccionados en lotes pequeños, a fin de ponerlos al alcance de todos.

Los trenes salen de la estacion del Parque a las 5, 6.50 y 12 de la mañana.

Pueden verse cualquier dia en el establecimiento San Mariano, y tres dias antes del remate en La Cabaña de los Sres Amaral e hijos.

En nuestra casa
78 —— ALSINA —— 78
El Jueves 19 de Enero
A las 3 p.m.

Remataremos a la mas alta postura y dinero de contado pasando la base arriba indicada por orden terminante de sus propietarios y por liquidacion de sociedad estos magnificos campos situados en el Partido de Bahia Blanca, y que podemos reputar sin exajeracionalguna los mejores, en cuanto a pastos y aguadas permanentes de aquella localidad; campos poblados hace aros de 21 años.

Los Manantiales—(Plano A)

LOTE No. 1—Una suerte de estancia o sean ¾ legua con frente al Naposta Grande arroyo de agua cristalina, permanente y dulce; linda por el N. este con D. cisto Laspiur, por el Sud, Oeste y Nor Oeste con Jorge Claras; tiene una poblacion construida de piedra y barro con techo de fierro de 4 reales por vara cocina con techo de paja y un corral de piedra para ovejas, grande y bien situado.

LOTE No. 2—Se compone de 4½ leguas mas o menos sobre el Naposta y linda por el N. O. con los Srs O Heusser Arce y Chautini; por el N. Este con el lote num. 3, y por el S. Oeste con Cuquet, Bajo Hondo y el Estado. Tiene en el Centro del campo, la Laguna de Manantiales y el arroyito del mismo nombre: las poblaciones son: sobre el Naposta grande uno de dos piezas de material y un pequeño galpon de lo mismo; otro de dos piezas, uno de adobe crudo y la otra de piedra con un gran corral de piedra para ovejas.

La poblacion de los Manantiales se compone de tres grandes piezas de material de adobe crudo con techo de tabla y fierro; a mas dos puestos construidos con los mismos materiales que estos ultimos.

LOTE No. 3º—Lindero con el anterior y se compone de 3 leguas aproximadamente con frente tambien al Naposta y fondo hasta el Bajo Hondo, tiene tambien una laguna 'Los Salados', una poblacion sobre el arroyo de una pieza de piedra como las anteriores y dos poblaciones de adobe crudo con techo de fierro.

El total de estos campos, conocidos por los Manantiales dista dos leguas y diez cuadras desde el Esquinero Oeste a la plaza del pueblo de Bahia Blanca y su superficie total segun la reciente mensura practicada por el agrimensor D. Federico Gomez Molina, se compone de 8 leguas cuad. mas 538 cua. cs.

La calidad de la tierra es en todas partes vegetal, arenosa. hasta una profundidad que varia entre media y tres cuartas vs. pero se nota de una manera bien clara la fecundidad de ella, en los parages donde ha sido removida ha brotado subitamente y en abundancia el trevol de carretilla y el alfilerillo, ambos pastos tiernos y dulces.

Aguadas—Tiene el Naposta Grande, las Lagunas, Los Manantiales y Saladas y el arroyito Los Manantiales.

Ademas, se encuentra el agua a diversa profundidad en este campo a consecuencia de los accidentes del terreno y que varia desde 1 hasta 13 metros de profundidad.

Pastos—Los pastos son mezclados, encontrandose el alfilerillo, trevol de carretilla, cola de zorro, pasto duro, flechilla, vinagrillo, té pampa, cebadilla y macadieu, predominando en un 80 o/o el trevol, alfilerillo, pasto duro y cola de zorro.

Este campo es apropiado para hacienda lanar y vacuna, indistintamente, la cual se encuentra en tal estado de gordura que se necesita trabajo encontrar animales que sirvan psaa el consumo.

Nueva Roma—(Plano B)

Se compone esta fraccion de tres y tres cuartas leguas cuadradas sobre el arroyo Sauce Chico y sus linderos son por el N E Juan y Eduardo Vidal y Francisco Ceico, por el S E Francisco D Bozsaur, por el N O los mismos Juan y S Vidal y por el S O. el Sauce Chico, dista este campo del Equinero Este 4½ leguas de la plaza principal del pueblo Bahia Blanca.

PASTOS—Estos son en general cola de zoro pastos duro y carretilla, existiendo unicamente en sus bajos y muy principalmente en los comprendidos por el arroyo Sauce Chico y Saladillo, Lezaga y Garcia, con gran abundancia el trevol de olor, alfilerillo, mostaza y te pampa Este terreno es apropiado por su mayor estension a la cria del ganado vacuno.

Calidad de la tierra: es semejante a la de los Manantiales y se nota tambien claramente la fecundidad de ella.

AGUADAS—Tiene el Sauce Chico arroyito permanente de agua dulce y cristalina, tiene ademas dos Saladillos o arroyitos.

Los verticales, debido a lo accidentado del terreno, se encuentran desde los 40 centimetros hasta los 11 metros de profundidad.

La venta de esta fraccion se hara de la manera siguiente—

Lote No. 4—Compuesto de una y media legua cuadrada.

Lote No 5—Una suerte de estancia o sean tres cuartas leguas con opcion a los Lotes No. 6, y 7, cada lote de ½ leguas.

Creemos de nuestro deber llamar la atencion de los estancieros sobre estos magnificos campos que como ve por los informes del agrimensor son de primera calidad.

Su situacion no puede ser mejor, distan apenas 2½ leguas del Puerto de Bahia Blanca, destinado a ser el mas importante en toda la costa Sud, de donde podran embarcarse directamente todos nuestros productos de la vasta campana Sud de lo Provincia.

El flete dado alli al riachuelo vale unicamente $3 por arb. de lana y enfardilada la mitad.

Ademas es publico y notorio, la prolongacion del ferro carril del Sud desde el Azul a este punto, asi que puede decirse con seguridad, yue estos campos en pocos anos valdran de $500 a 800,000 la legua.

Por planos e informes impresos, ocurran a nuestra casa Alsida 78, desde el 20 del corr. en adelante.

El Sabado 24 de Diciembre
A las 4 de la tarde

Remataremos con la base arriba fijada y plazos que se estipularan en el acto de la venta, por orden de su propietario, este magnifico campo arriba mencionado, compuesto de diez cuadras de frente al Rio de la Plata por 60 cuadras de fondo, todo alambrado con postes y medios postes de ñandubay a 3 y 10 varas de distancia, con 5 hilos alambre de patente; tiene 2 poblaciones de quincho con casillas de maderas, una techo de fierro de canaleta y otra teja francesa, pozo, quinta y tres cuadras sembradas de maiz y algunos arboles frutales.

Dista dos leguas de la Magdalena y doce cuadras de los Saladeros y magnifico puerto de la Atalaya.

Este campo puede facilmente producir un arrendamiento de 160 a 180,000 $ anualmente, pues es sabido que se paga desde 250 a 300 ps. cuadra al año para agricultura y para invernada de animales mas o menos, o lo mismo y lo prueba que actualmente hay en el campo de 70 a 80 caballos de la Empresa de Diligencias que pagan 1800 ps. mensuales.

El propietario no ha querido hacer contratas, porque tenia la idea de vender y las contratas suelen ser un gran inconveniente para la venta.

Ademas de las 600 cuadras, hay sobre la margen del Rio de la Plata 100 cuadras cuadradas mas o menos, bajo alambrado, de cuyo usufructo puede gozar el comprador de aquella area y que se puede aprovechar para muchas cosas.

En cuanto a la calidad del campo es de lo mejor de la Provincia y sus pastos todos tiernos con gramilla, trevol de olor y comun, cola de zorro, alfilerillo, flor morada, cardo asnal y castilla, como lo podran ver los que quieran visitar el campo para cuyo objeto no tienen mas que tomar las diligencias que salen de la Ensenada para la Magdalena, que los dejara en el mismo campo en la ultima posta del alambrado, donde hallaran al propietario que les enseñara todo el campo.

La venta se hara en lotes de 100 cuadras cuadradas o en un solo lote, pues la figura regular del campo se presta para ello.

Inutil nos parece llamar mas la atencion de los interesados sobre esta brillante propiedad.

Los campos de la Magdalena tienen fama en toda la Provincia y son rivales de nuestros mejores campos del norte, ademas no hay que olvidar que la proximidad del puerto de la Atalaya, para el embarque de los frutos y consiguientemente flete barato, es un punto muy importante que no hay que despreciar.

Con todas estas ventajas la base de 600 ps. cuadra es muy modica.

Al mismo tiempo.

1500 a 1800 ovejas mestizas, 10 caballos y 1 yegua de uso del Establecimiento, corrales de ovejas y caballos etc.

Titulos de primer orden.

Por mas informes, ocurrir a nuestra casa, 78 Alsina.

NOTA—Las personas que deseen asistir al remate pueden salir el Sabado 24 en el primer tren, y encontraran carruages en la Ensenada para llevarlos al Establecimiento donde se efectuara el remate.

Remataremos a la mas alta postura y dinero de contado, pertenesiente a la testamentaria del Sr D Pablo Gorostiaga.

Este magnifico terreno compuesto de 17½ vs de frente al Norte por 55 vs 65 cts de fondo al Sur.

El edificio se compone de tres piezas de material construidas en cal, tirantes y alfagias de maderas duras, techos de baldosas al costado izquierdo y en el derecho otra pieza de igual construccion, pozo, letrina etc.

Las cuatro piezas tienen piso de tabla, zocalos y contra marcos, una con cielo-razo de yeso y las otras de lienzo.

Estas piezas por su construccion, pueden servir perfectamente bien como arranque de un buen edificio, pues es solida y moderna.

Debemos llamar la atencion de las personas que buscan terrenos grandes y bien situados para construir casas de familia, sobre este cuarto de tierra que llenara a no dudarlo las exigencias del mas deficil. Buena calle, distante pocas varas del boulevard Callao. Barrio inmejorable lleno de hermosas casas, con tramway que pasa de un estremo a otra de la ciudad cada 3 minutes, hasta media noche, terreno vasto, en fin no se puede pedir mas.

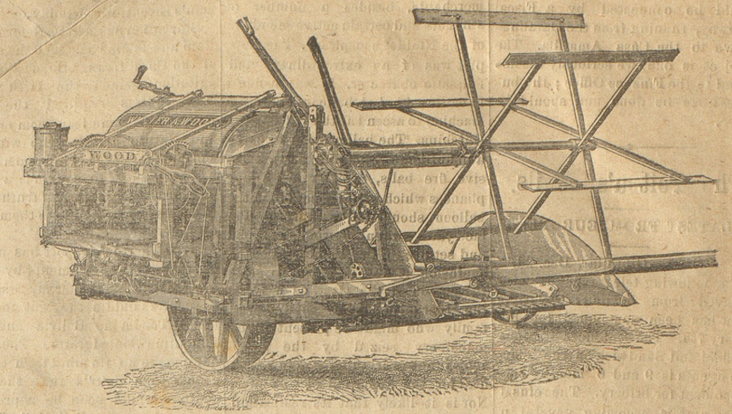
WALTER A WOOD'S HARVESTING MACHINES



A Competitive Field trial of Automatic Binders was held at Melbourne, in the Province of Victoria, Australia, on the 29th day of November, 1880, under the auspices of the Melbourne International Exhibition and in connection therewith, but under the direction and charge of the National Agricultural Society of Victoria.

The Machines entered for competition were:—

Walter A. Wood's Twine Binder,
Osborne's Wire Binder, Osborne's Twine Binder, McCormack's Wire Binder, McCormack's Twine Binder, Deering's Twine Binder.

(The judges in making their awards did not take into account the material used in binding, whether Wire or Twine, but were governed by the merits of the machine and quality of work done.)

Result of the Trial:

Walter A. Wood's Twine Binder
Was awarded the FIRST PRIZE.

THE REDUCTION OF ORES.

In no industry has science made less progress than in that of extracting the precious metals from their ores. Not that this branch of practical science has been neglected; for few others have in late years received more attention. Yet, notwithstanding, metallurgic chemistry has either failed to provide a process by which the entire gold or silver contents can be taken out of the ore, or the processes it has introduced have been so expensive that the great mass of ores yield no profit on their treatment. Still more strange, metallurgists have scarcely attempted to obtain any other contents of the ores than the precious metals. The base metals with which they are mixed,—zinc, lead, iron, sulphur, &c,—have been treated as worthless impediments in the way of procuring the small percentages of gold and silver; and thus an incalculable quantity of those metals, within ready reach, have been thrown aside and lost to the profits of mining. The State of North Carolina, for instance, contains an unlimited supply of pyritous ores which assay less than ten dollars per ton gold, and contain along with it sulphur, iron, zinc and sometimes copper worth thirty to forty dollars more. These ores have thus far been valueless, because no way has been found to utilize the base metal contents and no process has been as yet discovered that could extract the gold except at a cost exceeding its value. The same is true of an illimitable supply of even more valuable ores in the mining regions of the far West.

There is reason to hope that the old rude and wasteful methods of treatment are nearing their end and that, in the future, the poorest ores will be susceptible of profitable working and the most refractory subject to the extraction of their entire contents of every kind of mineral.

It is a long established fact in chemistry that heated Sulphuric Acid will completely disintegrate ores. That agent is used by the United States assay offices for assaying and is quite generally acknowledged to be the most effective disintegrator known to chemistry. Its application in the treatment of ores on a large working scale has, however, thus far been impossible; for no means has been applied for conserving the evaporated acid, and its heavy cost would preclude its use even at those points where it is cheapest, and much more in the large mining States, where it sells at over $100 per ton. These obstacles to its use appear to have been effectually surmounted by M. Sebillot, an eminent Paris engineer, through patented contrivances by which he condenses so much of the acid as evaporates and reproduces such portion of it as goes into combination with the ore in the course of treatment, both the condensation and the reconstruction being, it is claimed, effected at a comparatively nominal cost. The complete reduction of the ore is effected through mixing it, in a pulverised condition, with from one to one and a half times its weight of strong sulphuric acid, and subjecting it to a moderate heat until the acid is entirely evaporated. The reduced mass is then subjected to processes regularly practiced in metallurgy, and the entire contents of precious and base metals is obtained in a pure condition, the iron being available for the manufacture of steel without further change. As already stated, the acid that has been used in the conversion of the ore is saved or remade, with but a trifling loss, and is available for repetitions of use without limit.

The inventor claims that the cost per ton of thus procuring all the metals, precious and base, each in a chemically pure condition, is far less than that of procuring the gold and silver alone under the best and most carefully operated processes at present known; and considering the nature and the economies of the process and its exemption from destructive temperatures or expensive agents, there seems to be good 'prima facie' evidence that this claim may be well founded. The process professes to be equally adapted to all kinds of ores. For sulphurets it should possess a special adaptation, inasmuch as it conserves the sulphur and includes an apparatus for converting it into sulphuric acid at a small part of the cost common in the leading acid works of our manufacturing cities. In some parts of the country, this would be a most important advantage; as, for instances, in North Carolina, where the sulphur could be extracted from now worthless pyrites and made into sulphuric acid for the manufacture of phosphate manures, the residuum of the ore being treated for its base metals and such gold and silver as it might contain. When it is considered that large masses of those now useless ores contain in each ton about 950 lbs. sulphur and 950 lbs of iron and from $2 to $12 in gold, the profit that would accrue from such treatment becomes apparent. It is computed that Colorado ores contain, on an average, about 250 lbs of iron per ton, 200 lbs of zinc, 80 lbs of copper and 300 lbs of sulphur; which being claimed to be recoverable under this process would give it a most important advantage over the best existing methods.

Miners will perceive at a glance that, if this process can be successfully applied, a great revolution in mining must result. A method that gives the assay contents of gold and silver for half the present cost of procuring 60 to 95 per cent of those metals and that gives, in addition, all other minerals in the ore that have any value, would confer a largely increased value upon all ores and make profitable a vast extent of mining that can now be conducted only at a loss. It would not only increase the value of mining property, but would revive mines that have been abandoned because of the low grade or the refractory nature of their ores. Vast quantities of stubborn ores in Colorado that, while assaying $40 to $75 per ton of gold and silver are worthless because no process can reduce them at a profit, would then yield a good return to the miner. Indeed, it is not easy to put a limit to the extension of mining that must follow the successful application of such a process. However, forecastings may be very properly deferred until the the Sebillot method has had a fair trial, which it appears likely to have at an early day. A Company has been formed for working the process, and preliminary works have been started at Denver for perfecting the working details, preparatory to the erection of works on a large scale.

So long as we are accustomed to announcements of 'improvements' in reduction which turn out to be failures, it is proper to regard all new processes as on probation until their merits have been demonstrated by working results. It is only just, however, to M. Sebillot's method to acknowledge that it carries on its face more probability of success than new processes generally do. It comes from an engineer of acknowledged ability and character in his profession. It attempts nothing new in chemical processes. Indeed, beyond the condensation of the acid vapor and the reconstitution of the acid destroyed—which from expert evidence appear to be accomplished with success—the process includes nothing that is not commonly done in industrial operations. What is new seems to be the simplest part of the process, and what is old has been put beyond doubt by experience. This much must, in justice, be conceded in advance of trial; for the rest, we must wait for the verdict of results; though, from what we know of the process, we incline to an anticipation that the results will largely justify the inventor's claime.

THE FENIAN DISCLOSURES AT BRADFORD.

A Bradford telegram says: Since the discovery of Fenian stores at Manningham, the police have been doubled in the neighbourhood, and a close watch is kept upon the movements of certain suspected Irishmen. There is also a strong guard at the Town Hall night and day, and in case of emergency a hundred men armed with revolvers and cutlasses are ready at a few minutes' notice. The Bradford branch of the Irish Republic Brotherhood is very weak, several secessions having recently taken place owing to differences of opinion on questions affecting the Land League. The man Walsh, who fled from Middlesbrough as soon as Tobin was arrested, took part with Tobin in the assault on a policeman in July last, and left Bradford at the same time as his confederate. There is a warrant out for Walsh's arrest. The Bradford detectives who arrested Tobin at Middlesbrough on Monday saw Walsh, but had no reason to suspect that he had anything to do with the arms found in Tobin's house. It has now come to light that secret drilling has taken place in Bradford, a yard attached to the house of a member of the brotherhood being used as a parade ground.

Yesterday a large number of cartridges was found deposited in a the small outbuilding attached to the house of Police-constable Coulston, of the Bradford police, who discovered the Fenian store at Manningham on Sunday morning. It is supposed they were placed there by some Irishmen who are suspected of being members of the Fenian Brotherhood. A large number of documents and firearms have it is believed, been sent out of Bradford.

Conserving Salt.

Mark, 'Corona'.

Patented by the Governments of Germany, Austria-Hungary, Belgium, United States of America and other countries.

Prized in 16 Exhibitions in Europe, America and Australia.

The patented Conserving Salt is preferable to all other existing antiseptics because:—

1. it is a real chemical combination and no mechanic mingling of different Salts;
2. it thoroughly combines with the object to be preserved;
3. it is very easily applied and produces a quick and lasting effect;
4. its application leaves no disagreeable smell behind and even the choicest aroma is not influenced by its taste;
5. its application is not expensive;
6. and above all it is in no way detrimental to health, because it is entirely free of Salicine Acid and the like substances;
7. it is easily soluble in water and must for that reason be kept in a dry place.

Preserves every sort of meat, intestines and poultry, fat, tallow, fishes, milk, butter, cheese, fruit and all objects easily disposed to fermentation.

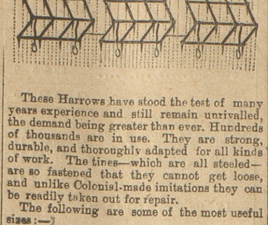
HOWARD'S CELEBRATED HARROWS

Howard's Iron Harrows.



These Harrows have stood the test of many years experience and still remain unrivalled, the demand being greater than ever. Hundreds of thousands are in use. They are strong, durable, and thoroughly adapted for all kinds of work. The tines—which are all steeled—are so fastened that they cannot get loose, and unlike Colonial-made imitations they can be readily taken out for repair.

The following are some of the most useful sizes:—

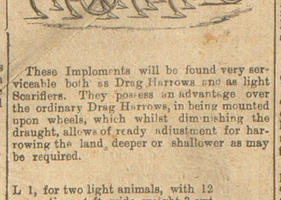
No. 11, for two or three animals, 10 feet wide, weight 2½ cwt....
No. 12, for two animals, 9½ feet wide, weight 1¾ cwt.....
No. 14, for one or two animals, 8½ feet wide, weight 1¼ cwt....
No. 20, for one animal, 7½ feet wide weight 1 cwt.....

Howard's Drag Harrows with Handles

These are the same as J. & F. Howard's ordinary Drag Harrows, but furnished with handles, by which convenient arrangement the tines can be pressed into the ground, or lifted out to clear them, as occasion may require.

H 16, a pair of 4-beam Harrows, with whippletree, 9½ feet wide 3½ cwt.....
H 16, a pair of 3-beam Harrows, with whippletree, 7½ ft. wide, 3 cwt.....
H 17, a pair of 4-beam Harrows, with whippletree, 9½ feet wide weight 3 cwt.....
H 17, a pair of 3-beam Harrows, with whippletree, 7 feet wide weight 2½ cwt.....
H 18, a pair of 4-beam Harrows, with whippletree, 8 feet wide, weight 2½ ctw.....

Howard's Self-Lifting Wheel Harrows



These Implements will be found very serviceable both as Drag Harrows and as light Scarifiers. They possess an advantage over the ordinary Drag Harrows, in being mounted upon wheels, which whilst diminishing the draught, allows of ready adjustment for harrowing the land deeper or shallower as may be required.

L 1, for two light animals, with 12 tines, 4 ft. wide, weight 3 cwt
L 2, for two or three animals, with 17 tines, 4½ feet wide, weight 3½ cwt.....
L 3, for three or four animals, with 23 tines, 5½ feet wide, weight 4½ cwt.....
L 4, for four animals, with 25 tines 7½ ft. wide, weight 5½ cwt..

The above Machines kept in Stock by the Principal Hardware Merchants.

Dysentery, Cholera, Fever, Ague, Coughs, Colds, &c.

Dr. J. Collis Browne's Chlorodyne

(Ex Army Medical Staff)

IS THE ORIGINAL AND ONLY GENUINE.

CAUTION.—Vice-Chancellor Sir W. P. Wood stated that Dr. J Collis Browne was undoubtedly the inventor of Chlorodyne; that the story of the defendant, Freeman, being the inventor was deliberately untrue, which he regretted had been sworn to. Eminent hospital physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr. Browne's.—*See Times*, July 12th 1864.

The Public, therefore, are cautioned against using any other than

Dr. J. Collis Browne's Chlorodyne.

REMEDIAL USES AND ACTION.

This invaluable remedy produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretions of the body, without creating any of those unpleasant results attending the use of opium. Old and young may take it at all hours and times when requisite. Thousands of persons testify to its marvellous good effects and wonderful cures, while medical men extol its virtues most extensively.

CHLORODYNE is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for coughs, consumption, bronchitis, asthma.

CHLORODYNE effectually checks and arrests those too often fatal diseases—Diphtheria, Fever, Croup, Ague.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery.

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Meningitis, &c.

From Symes & Co., Pharmaceutical Chemists, Medical Hall, Simla, Jan. 6th 1880. To J. T. Davenport, Esq., 33, Great Russell Street, Bloomsbury, London "Dear Sir, we embrace this opportunity of congratulating you upon the wide-spread reputation this justly-esteemed medicine, Dr. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a "deliberate breach of faith on the part of the chemist to prescriber and patient alike.' We are, sir, faithfully yours, Symes & Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists."

Extract from the General Board of Health, London, as to its efficacy in Cholera—"S o strongly are we convinced of the immense value of this remedy that we cannot too forcibly urge the necessity of adopting it in all cases."

CAUTION—None genuine without the words 'Dr J Collis Browne' on the Government Stamp. Overwhelming medical testimony accompanies each bottle.
